About me:

I'm a React Frontend Developer with more than 3 years of experience. I like transforming beautiful design layouts into well-functioning interfaces that benefit both users and business. I thrive on implementing interesting ideas and bringing projects to life. I'm passionate about technology and constantly seeking opportunities to learn and apply new skills!

Skills:

- **React**
- **Redux**
- **Next.js**
- **Astro**
- **TypeScript**
- **JavaScript**
- **HTML**
- **CSS / SCSS**
- **Git**
- **English (B1), Russian (Native)**

Work experience:

- **Space307** - From 26.04.2023 to now. Space307 is an international fintech company developing in-house trading applications. I have been developing sites and landings for different geo and languages for marketing purposes on React, TypeScript, NextJS and Astro. My responsibilities also include mentoring new employees on our project, helping and assisting them with any difficulties, conducting code reviews and getting feedback for improving code quality.
- **Montekrist Media** - 1 year 3 month (from January 2022 to March 2023). It was a commercial outsourcing company where I participated in various projects, mostly creating

websites and landing pages for products and services. We used React, TypeScript and NextJS.

Another experience:

- Manager in internet shop, shipping department. From October 2020 to November 2021. My responsibilities were creating and optimizing work processes to ensure that goods shipped on time, I also mentored new employees, documented work processes and ensured quality control.

Degrees:

- Secondary technical - Electromechanical technical school.
- Incomplete Bachelor's degree in Survey Engineering.
